DVR QUICK START GUIDE

STEP ONE:

Open your box with the DVR and make sure that everything you should have is included in the box. Some of the following items will be in the plastic bag and others may have fallen through the hand holds. Be sure you have everything. If you are missing a piece, contact support right away.

DVR Items in the box:

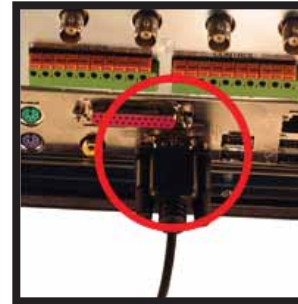

1. System
2. Keyboard
3. CD/Manual packet
4. Watchdog Cable
5. PTZ Control Cable
6. Power Cable
7. Modem Cable

STEP TWO:

Connect the Watchdog Cable to your DVR at BOTH Locations on the back. One end with the thumb screws should connect to Data 1 Serial Port and the other end should connect to the plug on the Watchdog card.

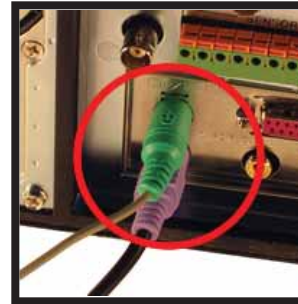

This cable allows your Watchdog feature to test the software about every ten minutes to insure that it is running properly. If it is unplugged it will restart

STEP THREE:

Connect the mouse and the keyboard to the DVR using the purple and green plugs that are located side-by-side. You can match the colors of the connection ports to the plugs.

- a.) Keyboard Plug Color
-purple
- b.) Mouse Plug Color
-green

STEP FOUR:

Connect the video monitor to the back of the DVR. Be sure to use the thumb screws that will ensure the plug is secure. With this step you can also match the color of the connection port to the color of the plug

- a.) Monitor Plug Color
-blue

STEP FIVE:

Connect the BNC cables to the BNC plate on your DVR (camera input). If you are using the 16 channel plate, you should use all 16 connectors that are grouped together like they are in the photo.

If you are using a 4 or 8 channel model, you will use the connectors that are located next to the monitor plug. Be sure that the cables are fully connected and secured by twisting them so the slide is completely on.

STEP SIX:

Connect the power cord to the back of your DVR. Be sure the switch on the power supply is set to " " and not "O". When this is done, you are ready to press the power switch on the front of your DVR.

Be sure to download the [manual](#) when you are done. This will show you how to set up everything on your DVR.

Please refer to this if when you have problems.
